Single-Variable Distributions made with ggplot2; R

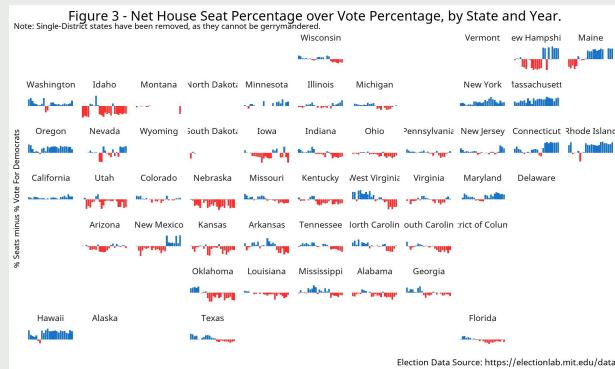

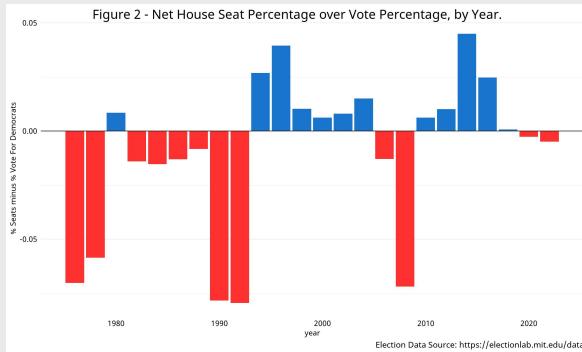

Multi-Variable Distributions

made with ggplot2; R

Time-Series & Categorical Data

made with ggplot2; R

R and Statistical Analysis Skills

Tidy Data Wrangling with dplyr

Proficiency in using the dplyr and tidyverse for cleaning and formatting data using filter(), select(), mutate(), arrange(), group_by(), summarize(), join() functions, and piping (%>%) to prepare data for analysis or visualization

Simple and Multiple Linear Regression

Experience with fitting and interpreting simple and multiple linear regression models in R using lm(), checking for homoscedasticity, and implementing categorical predictors with factor() variables.

Hypothesis Testing and T-Tests

Capable of performing hypothesis testing using t.test(), providing context for confidence intervals, and interpreting p-values and effect sizes to draw statistical conclusions.
